DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-46, 58-68, 72-74 and 76-77, drawn to targeted healthcare information including advertising, classified in class 705, subclass 14.
- II. Claims 47-57 and 75, drawn to targeted healthcare information involving a workflow process, classified in class 705, subclass 9.
- III. Claims 69-71 and 78, drawn to method for managing prescription refills, classified in class 705, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as displaying targeted healthcare advertisements, which involves distribution or redemption of coupon, or incentive or promotion programs; and invention II has separate utility such as computerized workflow process involving allocating resources or scheduling for an administrative function. Invention III has separate utility such as prescription refills management that is essentially health care management. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3626

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to J. Davis Gilmer (Reg. No. 44,711) on 9/6/02 to request an oral election to the above restriction requirement, but did not result in an election being made.
